

BHARATH SAI SUBHAKAR K

Azure Security Engineer | Cloud Security Posture Management (CSPM) | DevOps Engineer

Bangalore, India | Phone: +91-9110560924 | Email: bharathsaisubhakark@gmail.com | LinkedIn: [linkedin.com/in/bharathsai-subhakar-devops](https://www.linkedin.com/in/bharathsai-subhakar-devops)

PROFESSIONAL SUMMARY

Dynamic, results-driven **Azure Security and DevOps Engineer with 6+ years of enterprise experience** specializing in Cloud Security Posture Management (CSPM), infrastructure automation, and governance across Microsoft Azure and multi-cloud environments. Currently spearheading Azure Cloud Security and Foundation initiatives at **Volkswagen Group Digital Solutions**, leading continuous posture monitoring, misconfiguration remediation, and compliance enforcement via **Microsoft Defender for Cloud, Azure Policy, and Microsoft Entra ID**. Proven expertise in implementing security baselines aligned with **CIS, NIST 800-53, ISO 27001, and Microsoft Cloud Security Benchmark (MCSB)**, developing automated remediations via **Terraform, ARM/Bicep, PowerShell, and Azure CLI**, and designing executive posture dashboards.

TECHNICAL SKILLS

Cloud Platforms: Microsoft Azure, Amazon Web Services (AWS), Google Cloud Platform (GCP)

Cloud Security & CSPM: Microsoft Defender for Cloud (CSPM/CWPP), Azure Policy, Microsoft Sentinel (SIEM/SOAR), Security Score Optimization, Security Recommendations Triage, Vulnerability Management, Security Copilot

Compliance & Governance: CIS Benchmarks, NIST SP 800-53, ISO/IEC 27001, Microsoft Cloud Security Benchmark (MCSB), Policy-as-Code, Regulatory Compliance Audits

Identity, Access & Security Controls: Microsoft Entra ID (PIM, Conditional Access, MFA, RBAC), Key Vault, Encryption (at-rest/in-transit), NSGs, Azure Firewall, DDoS Protection, Private Endpoints

Security Assessments: IAM, Compute (AKS/VMs), Virtual Networks, Storage Accounts, and Database Security Assessments

Infrastructure as Code & Automation: Terraform, Terraform Cloud, ARM Templates, Bicep, AWS CloudFormation, PowerShell, Azure CLI, Python (Boto3), Go (Golang)

DevOps, GitOps & CI/CD: Azure DevOps (Pipelines, Repos), Logic Apps (SOAR Playbooks), Argo CD, Argo Workflows, Jenkins, OpenShift Container Platform (OCP Pipelines), Snyk, SonarQube, Checkmarx

Containers, OS & ITSM: Kubernetes (AKS), Docker, Quay, Linux, Windows Server, ServiceNow, JIRA, BMC Remedy

PROFESSIONAL EXPERIENCE

Volkswagen Group Digital Solutions

Bangalore, India

Senior Software Engineer / Azure Security Engineer July 2024 – Present Project: Azure Foundation, Cloud Security Posture Management & Governance

Environment: Azure, Microsoft Defender for Cloud, Azure Policy, Microsoft Sentinel, Entra ID, AKS, Terraform, Bicep, ARM, PowerShell, Logic Apps, Security Copilot

- Spearhead enterprise-wide **Azure Cloud Security Posture Management (CSPM)** and Azure Foundation architecture across multi-tenant corporate subscriptions, continuously tracking and optimizing Secure Score.
- Configure, manage, and audit **Microsoft Defender for Cloud** and **Azure Policy** initiatives, systematically identifying and remediating cloud misconfigurations, vulnerabilities, and policy violations.
- Enforce cloud security baselines aligned with **CIS Benchmarks, NIST SP 800-53, ISO 27001, and Microsoft Cloud Security Benchmark (MCSB)** across compute, network, identity, and data layers.
- Automate end-to-end security misconfiguration remediation using **PowerShell, Azure CLI, ARM/Bicep, and Terraform**, slashing mean-time-to-remediate (MTTR) for high-severity compliance find-

ings by over 45%.

- Execute end-to-end security assessments across **IAM (Microsoft Entra ID, PIM, RBAC)**, Azure Virtual Networks, Storage Accounts, Azure SQL/databases, AKS clusters, and Azure Key Vault encryption configurations.
- Engineer automated SOAR incident response playbooks using **Azure Logic Apps** and **Microsoft Sentinel** to quarantine compromised resources and trigger real-time containment for critical alerts.
- Design and maintain centralized **Azure Monitor Workbooks and interactive dashboards** to provide actionable reporting on security posture, remediation progress, risk findings, and regulatory audit compliance.
- Build an autonomous AI-driven agent and pilot **Microsoft Security Copilot** to investigate, summarize, and triage cloud infrastructure misconfigurations and emerging threat indicators.
- Author comprehensive monthly vulnerability management and compliance audit reports, leading cross-functional reviews with subscription and application owners to resolve posture deviations.

Carelon Global Solutions

Bangalore, India

Associate Software Engineer January 2022 – June 2024 Project: Olympus – Multi-Cloud Vending Platform & Cloud Landing Zone Migration

Environment: AWS, Azure, GCP, Go, Python/Boto3, Terraform Cloud, OCP, Argo CD, Step Functions, Lambda, PostgreSQL, Vault

- Architected and deployed a multi-cloud (Azure, AWS, GCP) automated vending platform (Olympus), establishing standardized security guardrails, IAM role baselines, and self-service provisioning workflows.
- Built backend orchestration workflows using Go, AWS Step Functions, and serverless architectures to automate Active Directory group provisioning, VPC/VNet peering, Route 53 DNS, and HashiCorp Vault secrets management.
- Implemented Policy-as-Code and integrated automated shift-left security scanners (**SonarQube, Snyk, Checkmarx**) directly into CI/CD pipelines to intercept vulnerabilities and misconfigurations prior to deployment.
- Managed GitOps CI/CD delivery for Azure workloads on OpenShift Container Platform (OCP) using Argo CD and Argo Workflows, ensuring auditable, immutable infrastructure releases.
- Executed migration of 70+ applications into enterprise Landing Zones with centralized security governance, least-privilege IAM policies, and modular Terraform configurations.

SYSBIG TECHNOLOGIES

Bangalore, India

Junior Software Engineer November 2020 – January 2022 Project: Dick's Sporting Goods (DSG)

Environment: Azure DevOps, Azure VMs, IIS, PowerShell, Git, Bitbucket, Bamboo, Windows Server

- Built and maintained multi-stage Azure DevOps CI/CD pipelines across Dev, QA, Staging, and Production environments for critical retail application workloads.
- Configured and secured Azure Virtual Machines, virtual networking perimeters, and **Azure Active Directory (Entra ID)** role-based access control (RBAC) policies and credentials.
- Developed PowerShell automation scripts for routine IIS web server administration, patch validation, certificate rotation, and infrastructure consistency checks.
- Governed source repository security policies, branch protection rules, and pull request sign-offs across Azure Repos and Bitbucket.

CERTIFICATIONS

- **HashiCorp Certified: Terraform Associate (003)**
- **Microsoft Certified: Azure Fundamentals (AZ-900)**
- **Microsoft Certified: Azure Data Fundamentals (DP-900)**

KEY HIGHLIGHTS & AWARDS

- **Triple IMPACT Award Winner:** Awarded 3 consecutive times for driving critical platform engineering milestones and delivery excellence.
- **Best Performer (Quality) of the Quarter:** Recognized by enterprise client for zero-downtime release governance and high-standard operational quality.
- **SPOT Award:** Commended by senior leadership for exemplary initiative and proactive technical stewardship.

EDUCATION

Bachelor's Degree

Yogi Vemana University (YVU)
