

CURRICULUM VITAE

Bharath Sai Subhakar K | ☎ +91- 9110560924 | ✉ bharathsaisubhakark@gmail.com

OBJECTIVE:

Dynamic professional with 6 Years of experience on performing Builds and deployments for .Net applications and java applications, AZURE, and AWS.

Currently working in “Volkswagen Group Digital Solutions” as Azure Security Engineer. Handling some basic responsibilities as well, like daily and weekly Tasks, fortnightly and monthly status reports, etc. The Objective is to become finest Team player and for the success to the next level in technical expertise while delivering quality work without any compromises. I am currently responsible for handling Builds/Deployments and Environment Management activities. Bilingual DevOps Engineer with background designing, testing, and implementing infrastructure and applications. Consistent team player with exemplary multitasking skills. Monitoring all the security events in Azure Cloud.

TECHNICAL SUMMARY:

- I have **6** years IT Experience in Software Configuration & Release management, building & deploying software, process creation, automation & Environment management activities and **DevOps** for .Net java android Based Applications using **Azure DevOps** & for java applications using **Bamboo** and **AWS**.
- Experience in end to end building and Deploying and configuring process implementation from Dev, QA environment to UAT and production in **Azure DevOps**.
- Hands-on Experience in **Azure Repos** Created branches and providing access.
- Permissions over branches and repositories in **Azure DevOps**.
- As a member of the **DevOps** team, I am responsible for CI/CD Pipelines for all Environments like Dev, QA, Staging and Prod.
- Maintained Azure Repos GIT repositories for **DevOps** environment: automation code and configuration.
- Experience in Software Configuration Management covering Build Management, Version Control, Environment Administration, Continuous Deployment, Admin Role for Repositories, Branches in **Bitbucket** Servers
- Good knowledge on SDLC process.
- Experience in both Windows and Linux Build environment.
- Experience on Azure cloud IAAS and PAAS (Infrastructure as a services and Platform as a services)
- Based on Client requirement will configure the Infrastructure in Azure Cloud.
- Migrating On prem to Azure and AWS clouds.
- Creating Virtual machines, networks, and storages in Azure cloud using **Terraform**.

- Knowledge on Configure the web applications and SQL databases.
- Creating and managing AWS accounts using Landing zone.
- Creating Azure resource groups and configuring them using SPN for connecting through terraform cloud and Vault.
- Creating users policies and registering applications in Azure AD.
- Worked on Site Recovery vault for Disaster Recovery.
- Installing and Configuring Azure Multi Factor Authentication for RDS environment.
- Experience in different services of **AZURE** like **Azure web app, Azure Storage Explorer, Azure Subscription, Application Insights, Virtual Machines, Load Balancers, IAM, Azure Active directory.**
- Experience in different service of **AWS** like **Lambda Functions, Step functions, IAM, EMR** (Elastic Map Reduce), **SCP** (Service Control Policies), **AWS code commit, AWS code build AWS code deploy, SQS, SNS, EC2, Load Balancer, VPC, Security groups.**
- Worked on implementing AWS **Landing zone** for the organization for governance.
- Creating the **VM** Instances and deploying the packages in same for different types of environments like DEV, QA and PROD in **Azure.**
- Having 3+ years of experience in Specialization includes implementation, deployment, migration, software installations, configurations, Testing and Maintenance of security products.
- Having hands-on experience in different LDAP directory servers MS Active Directory.
- Knowledge of Password Synchronization, Authorization and Authentication Configuration, debugging of user provisioning issues application server logs.
- Working on Azure cloud sentinel and Microsoft defender for cloud.

Achievements & Awards

- Awarded as a **best performer (Quality)** of the Quarter by Client for outstanding performance.
- **SPOT** Awarded for Building a Culture of appreciation and recognition.
- Got **IMPACT** award three times for the dedication and contribution in the team.

Core Competencies

- Source Code Management (Git, VSTS Git, Bitbucket(stash)).
- Build and Deployment, Release Engineering Support.
- Automation, CI Setup and Configurations using VSTS(**Azure DevOps**) and **Jenkins**
- Automation, CD Setup and configurations using VSTS(**Azure DevOps/ Bamboo**).
- Azure and AWS Cloud Environments.
- Terraform, ARM and CFT (IAC).
- OCP.
- Argo CD.
- Argo workflows.
- Azure security.

KEY SKILL SET:

Operating Systems	Windows and Linux
Build Tools	MS Build, Maven.
Version Control Tools	GIT, VSTS GIT, Bitbucket, AWS code commit and Azure repos
Continuous integration tool	Azure DevOps, Bamboo, Jenkins
Continuous Deployment Tool	Argo CD, OCP, AWS code deploy
Web/Application server	IIS(Internet Information Services) Web logic, Tomcat.
Microsoft Azure	Azure web app, Azure Storage Explorer, Azure Subscription, Application Insights, Virtual Machines, Load Balancers, IAM, Azure Active directory, Sentinel, Defender for Cloud, Logic apps.
Amazon Web Services	AWS EC2, VPC, ELB, IAM, Auto Scaling, etc.
Ticketing Tool	JIRA, ServiceNow, BMC Remedy
Containerization	Docker
container orchestration	OCP
Infrastructure As Code	Terraform, Cloud formation templates and Arm templates

WORK EXPERIENCE

1. Worked at SYSBIG TECHNOLOGIES.

Projects Experience

Project #1	DSG (Dick's Sporting Goods)
Designation	Junior Software Engineer.
Duration	2020 Nov to Jan 2022
Environment	Azure Repos, GIT, Azure DevOps Build & Release, Azure cloud.

Roles & Responsibilities:

- Develop and manage CI/CD process for different types of application and automate as many processes as possible.
- Manage and support customer environments in Microsoft Azure cloud.
- Consult customers on technical aspects of installation, sizing, scaling.

- Support development teams in technical questions of continuous integration/continuous delivery, delivery organizations.
- Experience in building and deploying java .net and android applications and troubleshooting the build and deploy failures.
- Created **Build** definition and **Release** definition for Continuous **Integration** and Continuous **Deployment**.
- Managing build **infrastructures** environment setups and monitoring daily operations in
 - **Azure DevOps** and enhancing/troubleshoot issues/problems.
- Responsible for User Management, Plugin Management and END-END automation of Build and Deploy using **Azure DevOps and Bamboo**.
- Creation the virtual machines in Azure Cloud.
- Creating the new repositories and give permissions in **Azure DevOps and Bitbucket**.
- Azure Active Directory basics:
 - Azure AD authentication, creating Users and groups, Roles.
- Creating and Configuring the CI for Updating the Nugget package.
- Creating and managing the IIS Websites in server from **Azure DevOps**.
- Creation of CI/CD pipelines for deploying the applications on Different Environments like Dev, QA, Stage and Prod.
- Compilation and runtime issues in Build failures, identifying build breaks and reporting to development team and interacting with developers to sort out issues related to Build Automation.
- Automating build scripts as per our requirement with CI tools and creating branches as per requirement Involved in automation of Deployment and Configuration process.
- Wrote PowerShell script for Stop/Start the IIS websites.
- Wrote PowerShell script for automation test results with attached email.
- Automated the code deployment process in each environment (Development, QA, Staging, and Production). Configured a continuous integration process and interface with the operations team to ensure project artifacts are deployed automatically to various environments using **Azure DevOps**.

2. Worked at **Carelon Global Solutions**.

Projects Experience	
Project #2	Olympus, AWS Landing zone, Legacy to New Landing zone migration and Azure Platform.
Designation	Associate Software Engineer.
Duration	2022 Jan to 2024 June
Environment	AWS cloud, Azure cloud, OCP pipelines, ARGO CD, ARGO workflow, Python Boto3 Scripting, Terraform cloud, Snyk, Bitbucket, Bamboo.

Roles & Responsibilities:

- Maintaining the Version Control System using Bitbucket, AWS code commit and Azure Repos.
- Configure the Continuous Integration using OCP pipelines and generating images and storing in Quay repositories.
- Achieved migrating 70 applications normal AWS accounts to Landing zone AWS accounts
 - where I have exposed to application's end to end S3 data migration and database migrations.
- Automated the AWS and Azure cloud resources creation using Terraform where we can modify the resources without impacting day to day business activities.
- To configure and maintain codebase to support the build and deployment of code on servers.
- Supporting the developers in configuration management environment.
- Creating the cloud resources in AWS and configure as per requirement.
- Deployment of Code in bitbucket and able to Integrate them with bamboo.
- Should create a fully matured bamboo CI/CD pipeline to have stable releases.
- Bamboo is used as a Continuous Integration tool for automation of daily process.
- Administered merge, build and deployment of the codes to all the environments.
- Responsible for creating the branches and tagging the code.
- Bamboo integration with Bitbucket, SonarQube, Check Marx one and AWS for building the code and deploying in AWS S3.
- Made the code 100% scan and clean before the deployment.
- Migrated data from S3 bucket to S3 bucket using replication rules.
- Created end to end automation for code build and deployment using AGRO CD and OCP pipelines in OCP.
- Using **Terraform** (IAC) in day-to-day activities to create and manage cloud resources.
- Worked for the team to build Azure Platform for the application teams to create their infrastructure in Azure using terraform cloud.

3.Working at Volkswagen group digital solutions.

Projects Experience

Project #3	Azure Foundation, Azure Cloud Security.
Designation	Senior Software Engineer.
Duration	2024 July to till now
Environment	AKS ,Terraform ,Sentinel ,Defender for Cloud, Logic apps, ARM templates, Azure Pipelines, Log Analytics, Security for copilot etc.,

Roles & Responsibilities:

- Creation AKS cluster regarding their request in Azure Cloud using Managed Cluster Service.
- Contributed in Development and Deployment of CMS Service in Azure Foundation
- Created Logic apps for automated response for repeated Azure Cloud security events like sentinel

and defender for cloud incidents

- Preparing Monthly reports for Vulnerabilities in each subscription and guiding the subscription owners to maintain security posture as per Azure Standards.
- Assigning recommendations to the resource owners and contacting them to resolve or remediate the recommendations.
- Proactively reaching out to the resource owners if there are any non-complaint and making them complaint.
- Created Governance rules for automatic creation of recommendations assignments.
- Integrating Security Copilot in our Environment in Test.
- Meeting with the Stake holders daily and getting the Tasks completed with the timeline.
- Built AI agent for investigating, summarizing and detecting of critical issues in the Security posture of the whole cloud environment.

Certifications:

- Terraform Associate-003
- Microsoft Azure Fundamentals-(AZ-900)
- Microsoft Data Fundamentals-(DP-900)
- Microsoft AI fundamentals-(AI-900)

Educational Qualification

Bachelor of Degree in YV University with aggregate of 70%

Declaration

I hereby declare that the above information is correct to the best of my knowledge.
